

Create Music in GarageBand in 5 Easy Steps

Donna_Chaff@wellesley.k12.ma.us

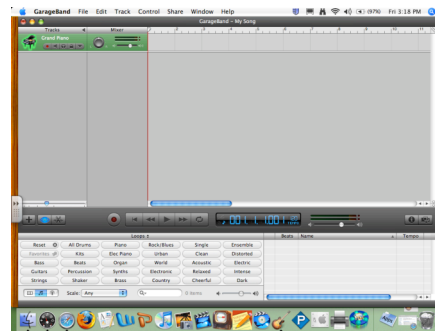

1. Open New Music Project

- Name song
- Save on desktop
- Change key, tempo, etc.

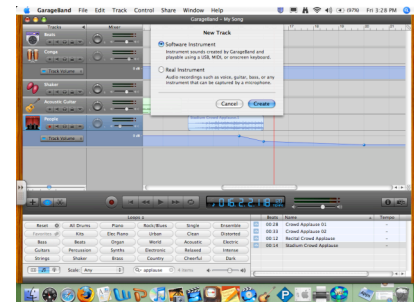

2. Add loops using the “EYE”

- Drag desired loop to create track
- Make tracks longer/shorter
- Search for sounds
- Copy/Paste loop as needed
- Click + sign to also create new track
- Press “return” to restart
- Space Bar stops & starts music

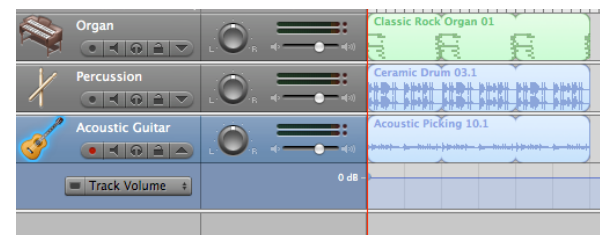

3. Record Voice / Real Instrument (if desired)

- Choose New Track or click on + sign
 - Choose Real instrument > Vocals > No Effects
- Add Melody using click Keyboard or Musical Typing found under “Window”

4. Adjust

- Fade out entire song or one track only
 - Track > Master Track
 - Click spot to begin fade and again to end fade
- Fade out one track only - click down arrow under track

5. Save & Send your work

- Export to iTunes
 - >Share> Send song to iTunes

ENJOY!
